**Infosolve Technologies, Inc. announces the addition of Multi
Domain Master Data Management capabilities to its Zero based data
quality suite OpenDQ**

Princeton, NJ February 2014 — Infosolve Technologies, experts in the area of industry leading data management solutions, are pleased to announce the addition of multi domain master data management capabilities with comprehensive data governance functionality to their enterprise data quality product OpenDQ, with the addition of multi domain master data management functionality OpenDQ enterprise data management platform is the most comprehensive zero license cost data management solution in the market.

Data aware organizations derive outstanding benefits through enterprise wide processes powered by trusted data and effective data management processes. Master data management, data governance and data quality form the foundation of the effective data management.

“A fundamental issue holding back enterprise wide implementation of data management has been the high licensing cost of software and the licensing restrictions around the usage of the software tied to the licensing costs” said Subbu Manchiraju Vice President at Infosolve Technologies, Inc. OpenDQ with its zero license cost redefines the data management market space with the functionality, features and scalability available under the OpenDQ platform. OpenDQ seamlessly integrates master data management, data governance and data quality into

one comprehensive enterprise data management product with outstanding scalability and exceptional reliability.

OpenDQ enables organizations to bring comprehensive data management capabilities to their enterprise structured and unstructured data. OpenDQ includes profiling, data matching, de-duplication, dictionary based standardization, business rules engine, multi domain master data management, data governance and reporting with comprehensive extraction, and transformation/loading capabilities.

About Infosolve Technologies

Infosolve Technologies (www.infosolvetech.com) was founded in South Brunswick, New Jersey in 2003 and provides clients with comprehensive data solutions that leverage the power of their enterprise data to achieve business objectives and create strategic opportunities-- without the burdens of cumbersome licensing agreements, complex term contracts and expensive hardware requirements. Infosolve Technologies embodies its Zero Based Solutions in every project with the Zero Defect Data Guarantee™, assuring that data is free from new data errors and inconsistencies. Infosolve's solutions are client driven in every aspect, from inception to results—focusing on client business drivers and required return on investment. The company represents years of expertise in implementing solutions for a wide spectrum of businesses from non-profit organizations to Fortune 100 companies.
