

January 2013

**Infosolve Technologies, Inc. announces the integration of  
Business Rules Engine Software to its Zero based data quality suite  
OpenDQ**

*Princeton, NJ January 2013* — Infosolve Technologies, experts in the area of industry leading data management solutions, are pleased to announce an exciting new feature to their enterprise data quality product OpenDQ, comprehensive business rules engine integration to the OpenDQ ecosystem empowering business and technical users to validate and enforce business rules across the enterprise in batch and real time seamlessly.

Business rules are the heart of software systems processing and support critical business functions in an organization. A vast majority of the business rules are embedded and locked in applications along with the code that runs them. Validation and enforcement of a single version of the business rules in real time and batch processing is a challenge for organizations. With the addition of the business rules engine to the OpenDQ ecosystem, validation and management of the business rules by business users and technical users in real time and batch mode becomes a seamless experience. OpenDQ enables organizations to bring comprehensive data quality to their enterprise structured and unstructured data. OpenDQ includes profiling, data matching, de-duplication, dictionary based standardization, business rules engine, reporting with comprehensive extraction, and transformation/loading capabilities.

## About Infosolve Technologies

Infosolve Technologies ([www.infosolvetechnology.com](http://www.infosolvetechnology.com)) was founded in South Brunswick, New Jersey in 2003 and provides clients with comprehensive data solutions that leverage the power of their enterprise data to achieve business objectives and create strategic opportunities-- without the burdens of cumbersome licensing agreements, complex term contracts and expensive hardware requirements. Infosolve Technologies embodies its Zero Based Solutions in every project with the Zero Defect Data Guarantee™, assuring that data is free from new data errors and inconsistencies. Infosolve's solutions are client driven in every aspect, from inception to results—focusing on client business drivers and required return on investment. The company represents years of expertise in implementing solutions for a wide spectrum of businesses from non-profit organizations to Fortune 100 companies.
